

DomeFest, the global festival for fulldome, proudly announces the finalists for the 2008 juried program. This year the festival had 29 entries from around the world. Chabot Space & Science Center (Oakland) again generously hosted the jury review session June 10. A distinguished jury of eight professionals (see below) selected 13 pieces for the final program, as well as two alternates. These entries will be competing for the coveted Domie Awards, to be announced at the premiere July 3 at the venerable Adler Planetarium (Chicago). Thank you to all the jurors for graciously donating their time and expertise to DomeFest, to Chabot, and especially everyone that entered the festival. It is exciting to see such diverse content being created for the fulldome medium, and we are proud to be able to showcase this content to the world.

### **Jury Selections**

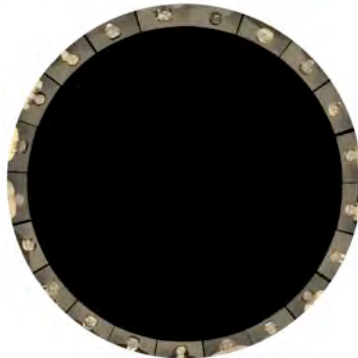

*Los Hijos Del Agua (Children of the Water)*

MediaPro

*Brim of Time*

Eastern New Mexico University

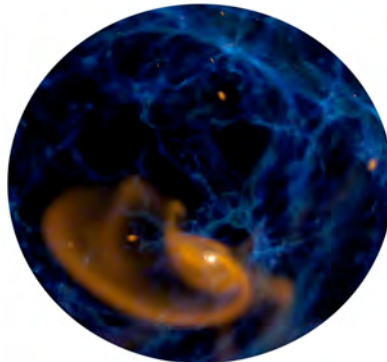

*Centrifuge*  
National Space Centre
